Professional Summary

Biotechnology undergraduate at the Indian Institute of Technology Delhi with strong interests in embedded systems, Internet of Things (IoT), web development, and AI-assisted engineering. Passionate about designing practical software and hardware solutions that integrate modern technologies with real-world applications. Experienced in developing responsive websites, cloud-connected embedded systems, and technical automation projects while continuously exploring interdisciplinary engineering.

Education

Year	Institute	Degree	CGPA/Marks
2023–Present	Indian Institute of Technology Delhi	B.Tech Biotechnology	5.62
2022	Jawahar Navodaya Vidyalaya, Bankura	Class XII (CBSE)	76.4%
2020	Jawahar Navodaya Vidyalaya, Bankura	Class X (CBSE)	80%

Technical Skills

Programming Languages

Python, C, C++, HTML5, CSS3, JavaScript, SQL

Web Development

Responsive Web Design, GitHub Pages, Frontend Development

Embedded Systems

ESP32, ESP8266, Arduino, NodeMCU, RFID, OLED Displays, IoT Sensors

Databases

Firebase, Supabase, PostgreSQL (Learning)

Developer Tools

Git, GitHub, VS Code, Grafana, LTspice, SimulIDE, Canva

Areas of Interest

Artificial Intelligence, Internet of Things, Embedded Systems, Automation, Biotechnology, Software Engineering, Research, Open Source Development

Projects

Student Management System <i>Full Stack Web Application</i>	2026
- Designed and developed a modern student management portal with responsive user interface and modular architecture. - Implemented secure authentication, student record management, and role-based administrative features. - Focused on scalable design, clean navigation, and maintainable project structure using modern web technologies.	
Department Website <i>Frontend Development</i>	2026
- Developed a responsive departmental website featuring semester-wise course resources and academic information. - Improved usability through intuitive navigation, mobile-friendly layouts, and optimized performance. - Maintained project using Git and GitHub with structured version control workflow.	
ESP32 IoT Monitoring System <i>Embedded Systems</i>	2026

- Built an IoT monitoring platform using ESP32 for real-time sensor data acquisition and cloud communication.
- Integrated wireless connectivity and live monitoring concepts for remote device management.
- Explored scalable embedded system architecture for future automation applications.

Grafana Dashboard Integration
Data Visualization

2026

- Designed interactive dashboards to visualize sensor and monitoring data using Grafana.
- Configured data sources and optimized dashboard layouts for clear presentation of real-time information.
- Investigated cloud-based monitoring workflows for engineering applications.

Personal Portfolio Website
Web Development

2026

- Designed and developed a responsive personal portfolio showcasing projects, technical skills, achievements, and resume.
- Implemented dark/light theme, responsive layouts, and modern UI components for enhanced user experience.
- Optimized the website for GitHub Pages deployment with fast loading and clean architecture.

Research Interests

Artificial Intelligence • Embedded Systems • Internet of Things • Biotechnology • Automation • Biomedical Devices
Software Engineering • Open Source Technologies

Achievements

- Qualified Joint Entrance Examination (JEE) and secured admission to the Indian Institute of Technology Delhi.
- Recipient of multiple merit-based scholarship opportunities during academic journey.
- Continuously expanding practical expertise through self-driven engineering and software development projects.

Positions of Responsibility

RDV Security Team
Indian Institute of Technology Delhi

- Contributed to crowd management and event operations during IIT Delhi’s annual cultural festival.
- Worked collaboratively with volunteers to ensure smooth coordination and safe execution of large-scale events.

Extra Curricular Activities

- Actively participate in athletics and sports activities at IIT Delhi.
- Strong interest in electronics prototyping, embedded systems, and open-source software development.
- Continuously explore emerging technologies through independent learning and hands-on projects.
